RUNCHERO PROJECT EARTH

Investment Profile

PROJECT SUMMARY

The Runchero Project Earth is part of its “Life Mission” for developing open-source methodologies, including a new knowledge base for people on Earth as an offline Body of Knowledge (BOK).

Phase I will be a member managed directory of resources which are shared openly with respected contributors. The intentions are to form an “online intentional community” which serves the Foundation of Intentional Communities http://www.ic.org and society as a whole, for shared content supporting education from subject matter experts, and free common language for sharing with the world.

LAST UPDATED:
12-June-2024

This project is in preview mode and is currently under careful review by ICGF directors. It is not currently accepting donations. We hope to offer this for donation/social impact investing soon.

SOCIAL AND ECONOMIC IMPACT
Number of Jobs: 12+
Expected Impact post Investment:
Participation and adoption of content management solutions from intentional communities and engaged contributorsof the world.

IP/Domain Holdings:
Runchero currently holds thousands of ".earth" domains with a commercial resale value of in the Millions USD based on future estimates from GoDaddy domain services.

Runchero will accept funding in the form of donations for maintenance, user / data security and content management from user interaction.

Date Invested:
Jan 2024 Core Development
June 2021 Project Planning
April 2018 Domain Acquisitions

PROJECT PHASES:
These are the initial project phases for developing a new knowledge base and language that will ultimately be self supported by the user community.

A platform is required to manage a member driven directory and content site for a knowledge platform. Tracking the sunset of https://en.wikipedia.org/wiki/DMOZ open directory project, a wikipedia style authentication methodology will need to be considered.

The navigation may use standard browser features and a flower (or tree) of life as a visual marker of where you are, where you are going, and where you have been.

Best practices from other current and past social platforms such as Craigslist (for geolocation), Nextdoor (locale based community communications), Dogpile Browser, DMOZ, Instagram and Pinterest.

INVESTMENT TYPE:
Business financing and Donations

TERMS: 5 year financing
USE OF FUNDS:
Technology development

DOMAINS:
We are accepting donations for development.

Please use the contact details above for more information about joining and investing in this project.

Exploring game-theory from a city building survival video game called Surviving Mars (as Surviving Earth), would integrate real world land contributions and highly-trained, materially and digitally compensated volunteer staff into inter-connected real-life communities. Sharing knowledge and living from the land will be the "new normal" for life and longevity.

Indexing examples to follow include:
TOLweb.org - Tree of Life Web Project
Knowledgemap.me - Human Knowledge Project

ICGF PROGRAM IMPACT
Program development will evolve until a dedicated community will take over the evolution, and more time will need to be allocated, especially with ambitions to include ERP functionality such as financials, inventory and order entry.

Financial loan performance and repayment can be easily managed by selling high demand properties as a fall-back measure.

PROJECT STATUS UPDATE
Project planning is completed for Phase I.
First update to include the need for a Declaration of Peace.
Collaboration to be assessed and business financing to be considered.

DOCUMENTATION
A project plan is available on request.

PROJECT SUMMARY

Knowledge is power. Participation and adoption of content management by intentional communities will assist engaged user around the world to seek out and preserve the root essentials we have lost from our ancestors.

Exploring game-theory from a city building survival video game called Surviving Mars (as Surviving Earth), would integrate real world land contributions and highly-trained, materially and digitally compensated volunteer staff into inter-connected real-life communities. Sharing knowledge and living from the land will be the "new normal" for life and longevity.
